Regional Infrastructure Projects in South-Eastern Europe

Have you ever seen a systematic presentation of all national strategies and international projects of Southeastern European infrastructure development? Probably not! Now you get the chance to have an exhaustive analytical overview on all energy, transport and telecommunication projects designed and implemented in this region. There is hardly any important question in the field that has been left with no satisfactory answer by the top class team of authors – experts, high ranking civil servants, economic and political analysts – of this book:

- Who designs infrastructure projects in the region?
- Who funds projects?
- What are the national strategic alternatives for infrastructure development and how to integrate them into a regional strategy?
- How do infrastructure projects in Southeastern Europe fit into the strategy of the European union to integrate the region?
- What is the place of Southeastern European infrastructure in the global projects for the Caspian oil transportation, the development of commerce and communication in the entire space of Europe, Russia and Central Asia?
- What is the macro-economic framework of Southeastern Europe infrastructure development?
- How does infrastructure development coexist with the conflicts in the region, and the process of post-communist transformation and limits of economic growth?
- How to fight or bypass bureaucratic impediments to successful investment into regional infrastructure? It's not easy, but it's possible!
- How to talk to national governments and negotiate deals with them?
- Which are the most successful international companies, dealing in the field of infrastructure in Southeastern Europe?
- What are the ecological aspects of transport and energy projects in Southeastern Europe?

All this and much more you will find on the pages of „**Regional Infrastructure Projects in Southeastern Europe**“. Find here the pre-views and the premises of what is going to be the reality of Southeastern European infrastructure in the feasible future! A reality in which you and your associates might well be part of!

IN THE CONTEXT
